# 1. Challenges in Parks

# Challenges

What frustrates your visitors and your team today

- **Manual access management:** lost or broken keys, operational delays.
- Deposit management for locker rentals.
- **Long lines at lockers and access points.**
- Manual lockers: requiring constant staff support or often out of order.
- **Avoidable costs:** employees focused on routine work, missing out on revenue growth. resources without digitalization.
- Outdated technology that gives a bad impression.
- **Thefts and losses that lead to complaints.**

# How does it affect?

- High operating costs: Overloaded staff
- Lower perception of quality.
- Loss of revenue.
- Logistical and security problems..

# VACWAY

## What is it?

We are a technology partner and service provider with strong development and production capabilities thanks to creating our own technology. We design and manufacture vending systems ranging from automated lockers to self-service kiosks.

# 3. VACWAYlockers

Take your park to the next level

Touch keyboard

# VACWAYlockers

**VACWAYlockers** is an innovative self-service locker rental and management system. It replaces traditional key-operated lockers with smart lockers equipped with cutting-edge technology, controlled by custom software tailored to your needs. This system improves the customer experience while significantly enhancing security.

Software designed to adapt to you: flexible, scalable and fully customizable according to the needs of your fleet.

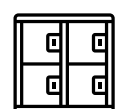

# Why VACWAYlockers?

**Vacway Lockers** is the perfect solution for modernizing locker management in parks, completely eliminating manual locker procedures. Its **automated system** offers visitors a **faster, more seamless, and more comfortable experience**, while **generating additional revenue** through locker rentals.

It **enhances security** by reducing the risk of loss or theft, and ensures optimal accessibility for all with a multilingual interface and integrated voice instructions.

# Key Benefits for Parks

- **Efficient customer flow:** Fewer lines and faster access.
- **Increased security:** Reduced theft and loss of personal belongings.
- **Improved experience:** Visitors enjoy an uninterrupted and worry-free visit.
- **Monetization of services:** Automated lockers and ticketing generates additional revenue.
- **Reduced operational burden:** Fewer staff to manage entrances and store personal belongings.

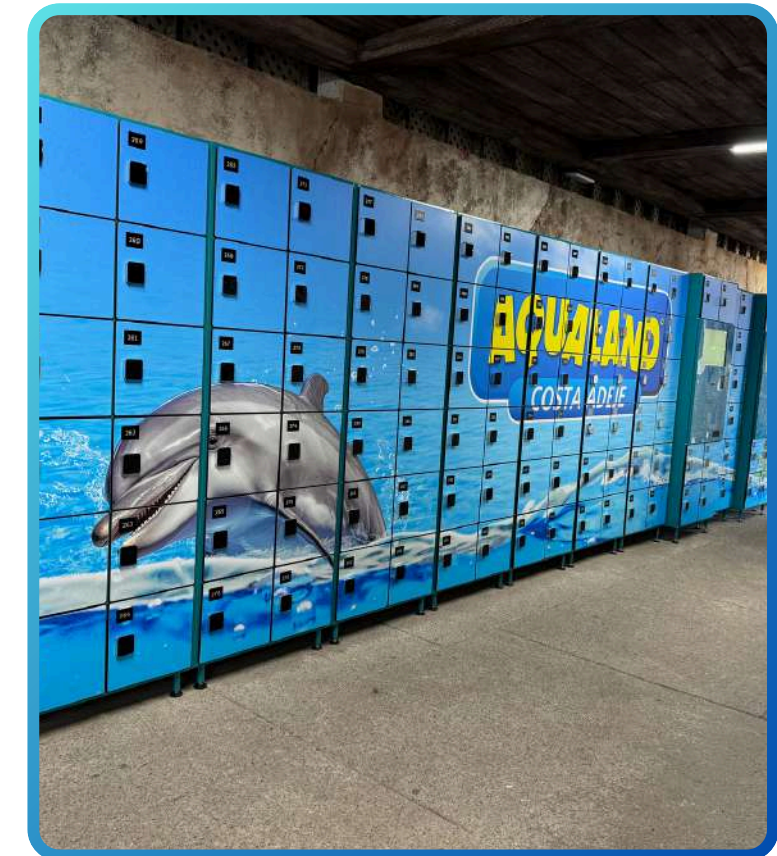

# And on top of that... design them however you want!

We design and customize the locker sizes according to your needs. You can choose the finish, design, and material you want: metal structure, or stainless steel, with phenolic doors. Other interior material options include water-resistant CDF and MDF.

Both are available in basic finish (without vinyl or image) and premium finish (vinyl wrapped with your logo or desired image).

## THEY TRUST US

# VACWAYlockers Gallery

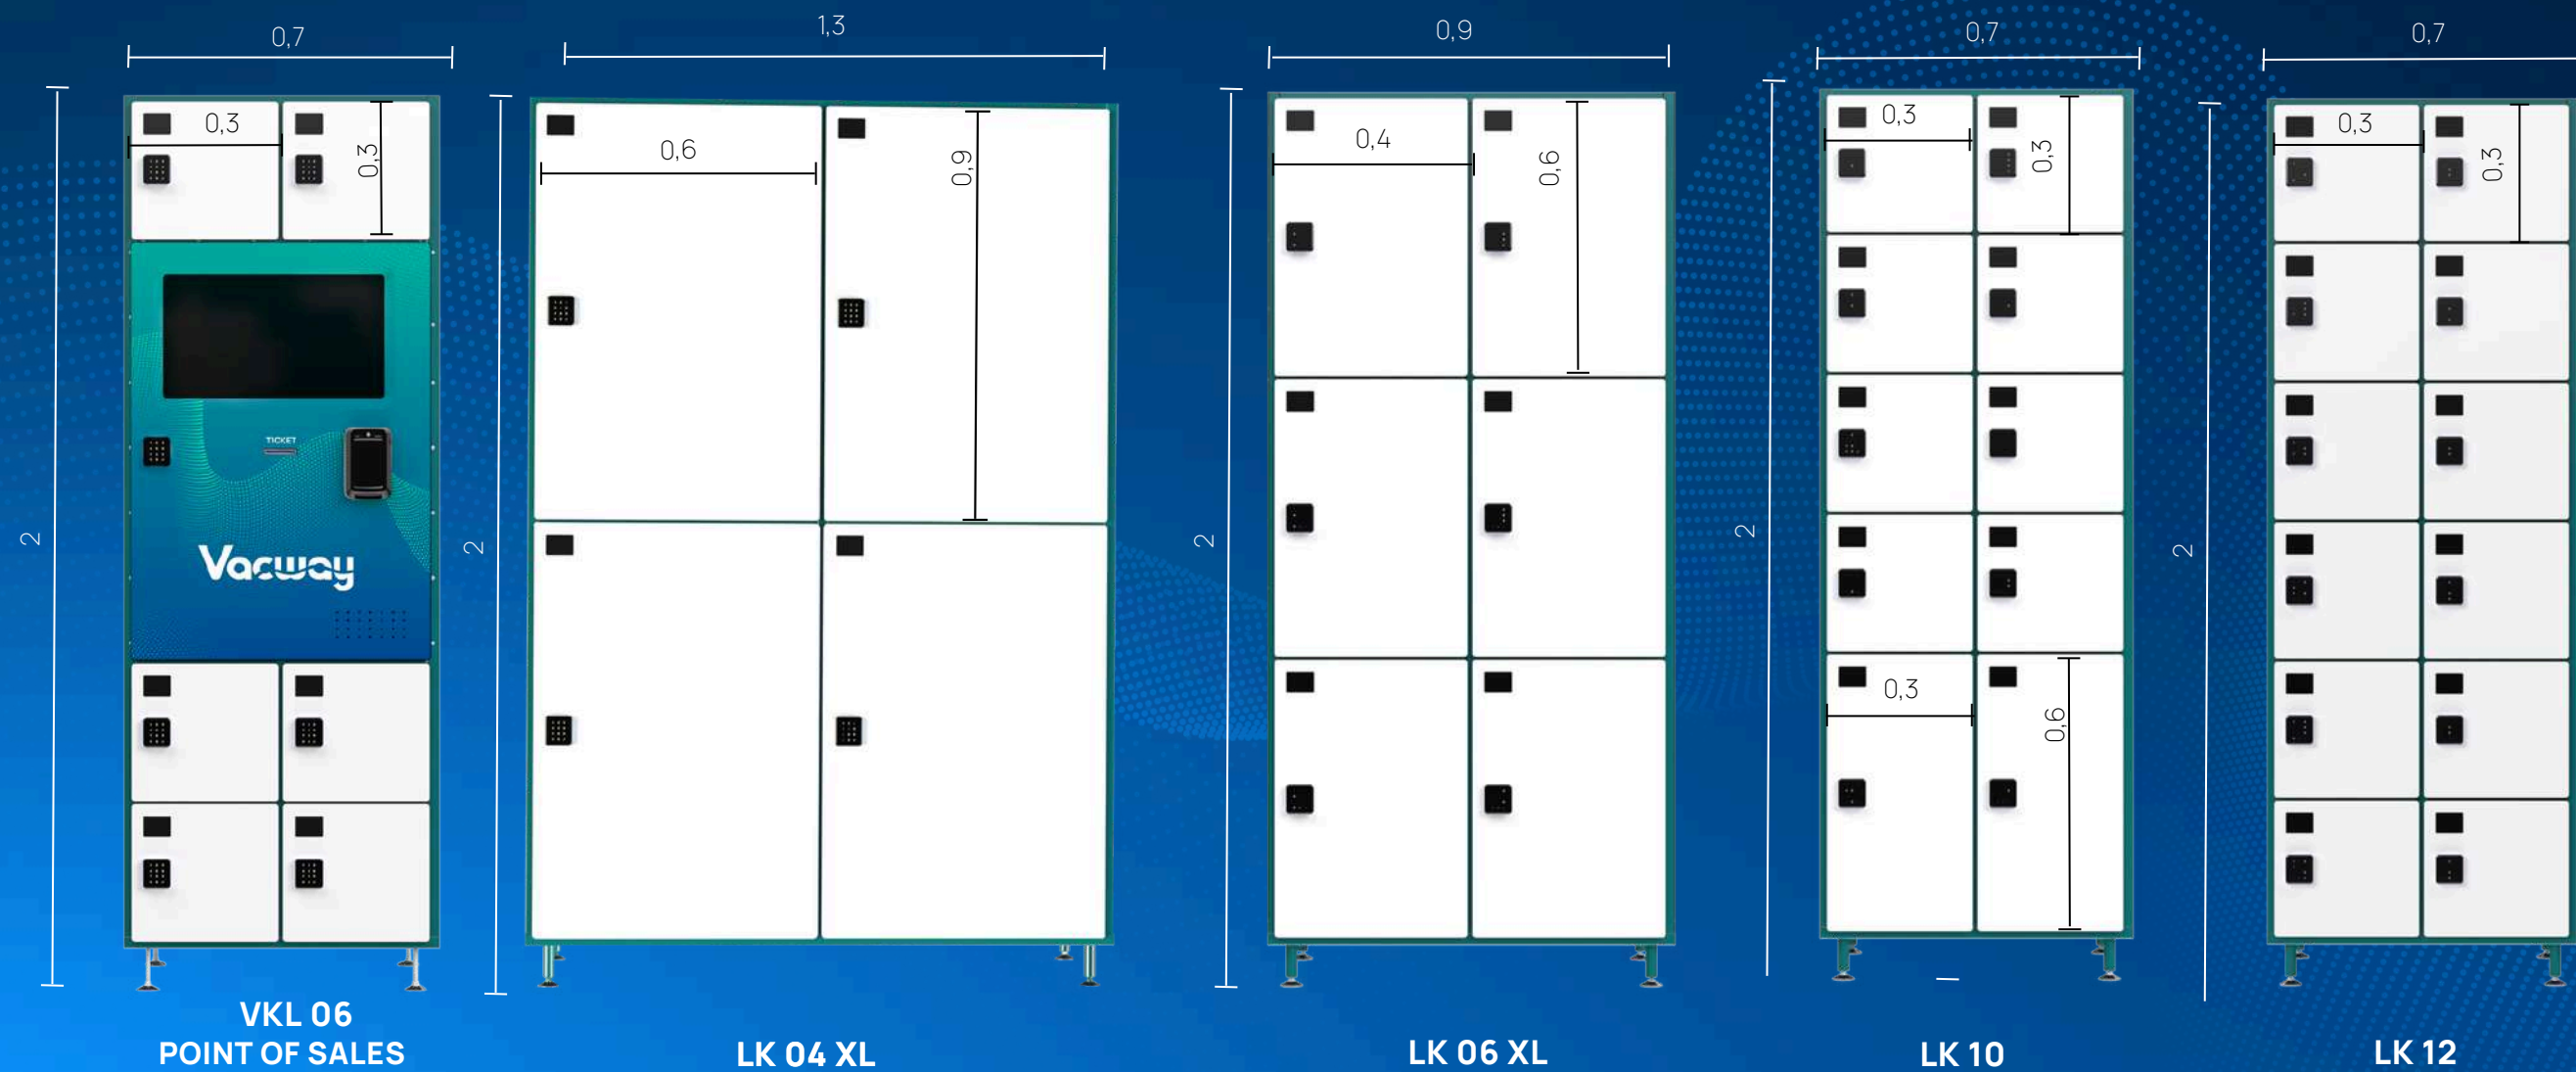

## Choose different sizes

You can choose the locker size that best suits your needs and even combine different sizes within the same locker unit.

## Choose from different finishes and colors

We adapt to your brand colors and customize it to your liking. 14.

# The most complete and autonomous solution on the market

for locker management in amusement, theme and water parks.

We offer: total control, user autonomy and a seamless technological experience.

## DYNAMIC SEASONAL PRICING

Set custom rates **based on demand, key dates, or peak seasons**, strategically and automatically **maximizing revenue**.

## QUICK ACCESS SYSTEM

Unlike other systems that require users to return to the terminal each time they access the locker, our quick access system allows them to **open the locker directly using a dedicated keypad for each unit**. Greater convenience, less waiting, and a simplified user experience.

## REAL-TIME SALES REPORT

**Track your sales and view revenue by channel:** cash, card or online payment, in real time. **Manage all your transactions from a centralized platform** for simplified and efficient control.

## QR CODE

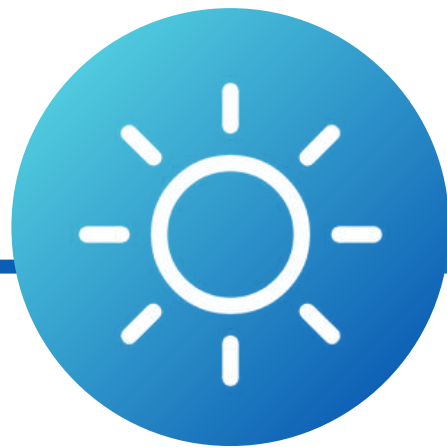

Customers can **manage and pay** for the service **directly from their smartphone via a QR code**. The **process is 100% automated** and there's no waiting.

# Functioning modes

Designed to reduce queues and operational times, our quick access system allows fast and secure entry. After purchase, visitors can manage access to their belongings independently by simply entering their PIN on the locker instead of at the point of sale very different from other solutions on the market allowing them to focus solely on enjoying the experience.

## Mode#1 Per day

Allows the customer to open the locker as many times as they want within 24 hours

**RECOMMENDED**

## Mode#2 Per hour

Allows the customer to open the locker as many times as they want during the rental period.

## Mode#3 Per opening

Allows the locker to be opened once for each payment made.

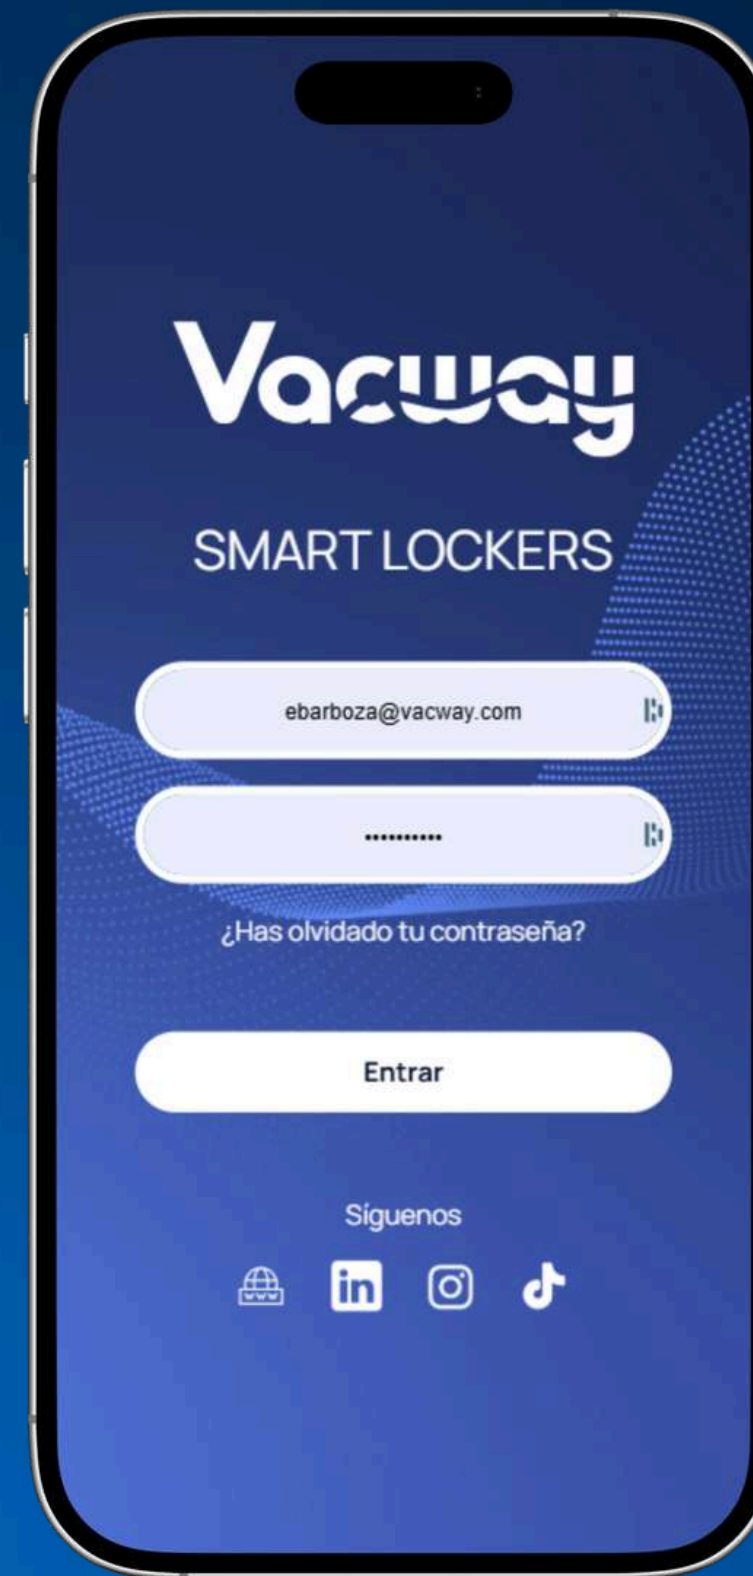

# Speed up self-management with QR code

Your customers no longer have to go through the payment booth to reserve their lockers. Now, using our QR code, they can self-manage and pay for this service directly from their own mobile devices. No lines and 100% automatic!

At the end of the online purchase process, they will have the locker number and PIN code on their mobile device, along with additional information about the purchase.

TRY IT YOURSELF

Your lockers, your style: customize, monetize, and forget about keys.

# 4. VACWAYkiosk

Technology that streamlines entry, reduces queues and optimizes each visit

### Touchscreen

21.5" high-brightness touchscreen  
with anti-reflective glass

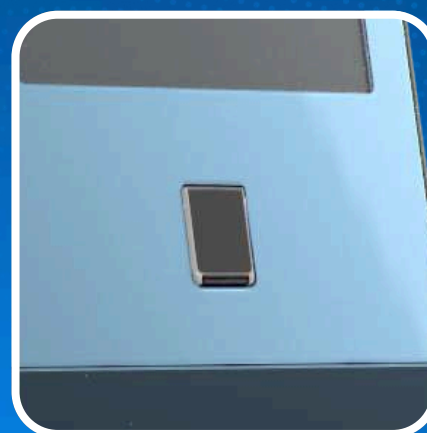

# VACWAYkiosk

VACWAYkiosk is an **automated solution designed for the automated sale of tickets or wristbands**. Thanks to its advanced technology, it streamlines the access process and reduces queues. Additionally, it enables the **sale of complementary products such as food and beverages**, offering users a comprehensive experience from a single self-service point. Its customizable software adapts to the needs of each event or entertainment venue, optimizing the user experience and **minimizing staff intervention**.

### Payment system

Card payment.

# 5. VACWAYone & VACWAYmini

Offers advanced vacuum and heat sealing technology to waterproof smartphones

21.5" touchscreen

# VACWAYone

VACWAYone is **the most efficient solution on the market for waterproofing smartphones in water parks**. Thanks to its vacuum heat-sealing technology, it protects devices while fully maintaining their functionality and quality. Fully transparent and compatible with touchscreens, it allows for exceptionally clear underwater photos. Much more than protection, **VACWAYone enriches the visitor experience while generating additional revenue for the park.**

VACWAY Advanced Waterproofing System  
for Smartphones.

Operation display: LED and  
BLUETOOTH ON/OFF

# VACWAYmini

**VACWAYmini is the compact and smart solution for sealing smartphones at the point of sale.** Specially designed for retail, it combines heat sealing and vacuum packaging to protect phones in seconds, without compromising their functionality.

**Completely transparent,** this waterproof case maintains touchscreen sensitivity and allows for crystal-clear photos, even underwater.

**Easy to install and requiring no technical skills,** VACWAYmini opens up a new revenue stream thanks to this innovative service, appreciated by your customers.

VACWAY Advanced Waterproofing System  
for Smartphones.

# Additional options and accessories

**VACWAYpack**

Vacuum-sealed waterproof protection for smartphones. 100% waterproof guarantee.

**VACWAYlay**

Waterproof smartphone holder strap with collar, equipped with a secure quick release system.

**VACWAYgo!**

Neoprene strap providing comfortable carrying of the waterproof smartphone around the arm.
